Beer Dispense Panel for BOC Ireland – BA465

Manufactured in Zintec and finished gloss white the panel is extremely easy to install.

All pipe work connections are suitable for 3/8" diameter tubing. Fittings are the push in variety for ease of installation.

The panel includes isolating valves and pressure indication on each outlet.

Dual protection pressure relief valves rated to suit current codes of practice are also included

Features include

- Lightweight design
- Wall mounted installation
- Quick fit couplings
- Patented mixing valve
- Manufactured to conform to pub cellar codes of practice
- The panel is designed for CO₂ and N₂ gas supplies.
- CO₂ needs to be supplied at between 5 barg and 6 barg
- The N₂ mixed gas needs to be supplied at between 6.0 barg and 11.0 barg
- Regulator is supplied for each mixed gas outlet
- Isolating valve and gauge supplied for each mixed gas outlet
- Dual Protection Pressure Relief Valve
- Inlet and Outlet Connections 3/8" tube

Outlet Gas Mixture pre-set at 20% +30% + 60% CO₂

This system greatly reduces the complexity of gas cylinder delivery and handling. The panel provides a very effective, low cost solution for beer dispense in pub cellars.
