Industrial Gas Solutions

BOC SUREBLEND

The BOC Sureblend Panel is made exclusively for BOC Sureserve

Manufactured in Zintec and finished gloss white the panels are extremely easy to install. All pipe work connections are suitable for 3/8" diameter tubing. Fittings are the push in variety for ease of installation.

Features include

- Lightweight design
- Wall mounted installation
- Quick fit couplings
- Patented mixing valve
- Manufactured to conform to pub cellar codes of practice
- The panel is designed for CO₂ and a CO₂/N₂ mixed gas supply.
- CO₂ needs to be supplied at between 5 barg and 6 barg
- The CO₂/N₂ mixed gas needs to be supplied at between 5.5 barg and 7 barg
- Regulator is supplied for Each Mixed Gas Outlet
- Dual Protection Pressure Relief Valve
- Inlet and Outlet Connections 3/8" tube

Mixtures are pre-set at
30% + 50% and 60% CO₂

This system greatly reduces the complexity of gas cylinder delivery and handling. The Sureblend provides a very effective, low cost solution for beer dispense in pub cellars.
